PROFESSIONAL SUMMARY

I am a software professional with strong experience in **automated testing, test case design, API validation, data verification, CI/CD workflows, and software quality assurance**. I have proven ability to work across complex systems involving **Python, SQL, JavaScript, C#, C++, Java, Prolog, Scheme, AWS, G-Suite, Ms. Exchange, Azure DevOps, and distributed systems**. I am experienced in Agile environments, collaborating closely with developers, analysts, and stakeholders to deliver reliable, high-quality software.

TECHNICAL SKILLS

Test & Quality Engineering

- Test Automation Framework Design
- Functional, Regression, Integration & API Testing
- Test Case Design & Execution
- Data Validation & Integrity Testing
- Performance & Reliability Analysis
- Defect Tracking & Root Cause Analysis

Programming & Scripting

- Python, Java, JavaScript, C#, SQL
- Bash / Shell scripting

Automation & Tools

- API Testing (Postman-style workflows, REST APIs)

- Azure DevOps (Repos, Pipelines, CI/CD)
- Git / GitHub
- Unit & Integration Testing
- JSON / XML Data Validation

Databases & Data

- SQL, MySQL, SQLite, MongoDB
- BigQuery
- Data Migration Validation
- ETL & Data Reconciliation Concepts

Development Practices

- Agile / Scrum SDLC
- Waterfall SDLC
- CI/CD Pipelines
- Distributed Systems Fundamentals

PROFESSIONAL EXPERIENCE

King County Metro (Sound Transit) — Light Rail Operator

February 2025 – Present

- Operate mission-critical systems under strict safety, procedural, and compliance standards.
- Accurately document incidents, anomalies, and system conditions.
- Communicate effectively with centralized control systems.

Scale AI — Software Engineer / AI Consultant (Contract, Remote)

January 2024 – Present

- Designed, executed, and validated **automated test cases** for Python, JavaScript, SQL, and Java solutions used in large-scale AI systems.
- Performed **API-level validation** and data correctness checks for complex workflows involving structured and unstructured data.
- Validated **data integrity and transformation logic** for large datasets using SQL, BigQuery, and distributed system concepts.
- Developed **test scenarios, edge-case validation, and regression coverage** to ensure correctness and reliability of AI outputs.
- Reviewed and debugged AI-generated code, identifying logical errors, performance bottlenecks, and data inconsistencies.
- Collaborated with cross-functional teams to improve **test coverage, performance reliability, and system scalability**.
- Applied Agile practices to continuously improve testing strategies and delivery timelines.

iCode Bellevue — Coding Instructor / Technical Trainer

September 2024 – February 2025

- Delivered structured instruction in **programming logic, debugging, testing fundamentals, and software correctness**.
- Guided students through writing, testing, and validating functional code solutions.
- Assessed code quality, identified defects, and coached students on debugging strategies.

- Maintained detailed performance documentation and ensured consistency in technical standards.
-

IQVIA MedTech — Field Service Agent

November 2023 – Present

- Supported installation, testing, configuration, and validation of **medical hardware and software systems**.
 - Assisted with **system verification, troubleshooting, and post-deployment testing**.
 - Documented test results, issues, and resolutions following strict compliance requirements.
 - Collaborated with engineers and technicians in regulated, high-reliability environments.
-

Holy Lamb Organics — IT Administrator Intern (Remote)

February 2023 – August 2023

- Maintained and tested Linux-based servers and web systems for uptime and reliability.
 - Performed **email migrations, DNS configuration, and system validation testing**.
 - Applied networking fundamentals (TCP/IP) to diagnose and resolve system issues.
 - Supported CI-style workflows for deployment and system maintenance.
-
-

PROJECT EXPERIENCE

Eon's End RPG — Software Engineering Capstone

- Built and tested a large-scale C# application using **Agile/Scrum SDLC**.
 - Designed test cases covering gameplay logic, data handling, and system performance.
 - Used **Azure DevOps** for version control, backlog tracking, and collaboration.
 - Created tools to reduce repetitive development and testing work.
-

Task Manager Web Application

- Developed a full-stack application using **Node.js, Express, MongoDB**.
- Implemented and tested CRUD APIs using REST principles.

- Validated database operations and API responses.
-

Quotation Desktop Application

- Built a C++ / SQLite application with search, CRUD operations, and validation logic.
 - Designed tests for search accuracy, data persistence, and user interaction.
-

EDUCATION

Bachelor of Science — Computer Science

Seattle Pacific University | GPA: 3.56

Associate of Science — Direct Transfer

Everett Community College | GPA: 3.86

Honors: Phi Theta Kappa, President's Awards

LANGUAGES

- English (Fluent)
- Oromo (Fluent)
- Amharic (Fluent)
